Advanced Inspection Services Quaternary Annulus Cleaning

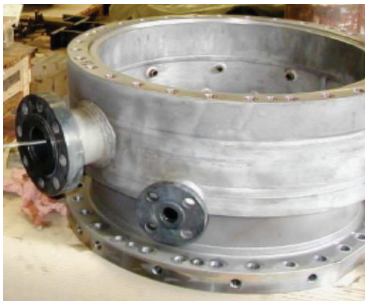

Quaternary Annulus cleaning can reduce the risk of operational issues such as elevated dynamics, high exhaust spreads, and unit trips. This cleaning and inspection service satisfies the recommended TIL 1724.

Inspection Applications:

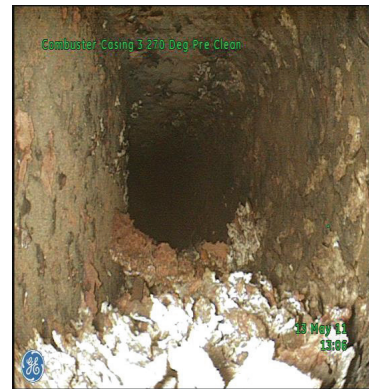

- This method is for Frame 7FA gas turbines with DLN 2.0 and DLN
- 2.6 combustion systems using quaternary fuel during operation.

Related Applications:

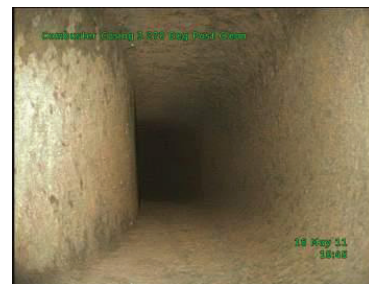

- Dry steam cleaning for 7 and 6 series gas turbines, can also be performed during various types of outages.
